SUMMARY

Full-stack .NET developer with 3+ years of experience building enterprise applications using Microsoft technologies. My core stack includes C#, ASP.NET Core, Blazor, Angular, Microsoft SQL Server, and Azure. I have worked on end-to-end feature development, REST API integrations, database design, and the maintenance of cloud-hosted business systems in both web and mobile projects.

WORK EXPERIENCE

Quadro Byte Zrt., Budapest

June 2023 – Present

Main responsibilities

- Development and maintenance of ASP.NET-based enterprise systems.
- Backend and frontend development using C#, Blazor and Angular.
- Designing, developing and rolling out new features, and enhancing existing systems.
- Designing and managing MSSQL databases, writing complex SQL queries and stored procedures.
- Developing, integrating and documenting REST APIs.
- Building custom software solutions to support business processes.
- Version control with Git and participation in agile teamwork.
- Deploying, maintaining, and supporting applications hosted in Microsoft Azure environments.

Key projects

Web-based POS / cash register system (Blazor)

- Development of a modern web-based cash register system using Blazor.
- Building dynamic user interfaces and business logic.
- Implementing cart management, payment and authorization features.
- Handling API integrations and database management tasks.

Mobile inventory application (.NET MAUI)

- Development of a cross-platform mobile application using .NET MAUI.
- Adding support for Zebra TC21 devices.
- Implementing barcode and QR code scanning features.
- Optimizing warehouse stock management and inventory processes.

EDUCATION

Business Informatics, Óbuda University

September 2020 – May 2023

- Specialization in Enterprise Information Systems

LANGUAGES

- **English** – B2 (intermediate)
- **German** – conversational level

SKILLS

- **Backend:** C#, .NET / .NET Core, ASP.NET Core, Web API, Entity Framework Core
- **Frontend:** Angular, TypeScript, JavaScript, HTML5, CSS3 / SCSS
- **Databases:** Microsoft SQL Server, T-SQL, stored procedures, optimization fundamentals
- **Cloud / DevOps:** Azure App Service, Azure SQL Database, Azure Storage, Azure Functions, Azure DevOps, Azure AI Foundry, Azure CI/CD Pipelines
- **Testing:** unit testing fundamentals (xUnit / NUnit)
